PROFILE SUMMARY

Full Stack Mobile Developer with 2+ years of experience delivering high-quality mobile applications and end-to-end solutions. Passionate about building reliable, user-focused products and continuously improving through learning and innovation.

TECHNICAL SKILLS

Languages	: Dart, JavaScript
Frameworks	: Flutter
Database	: Hive, sqflite, MongoDB
AWS	: EC2, Route53
Architecture	: Model-View-Controller (MVC), Clean Architecture
State Management	: BLoC, Cubit, Provider, GetX
Familiar	: Data Structures and Algorithms, RESTful API, Asynchronous Programming
Dev Tools	: Visual Studio Code, Git, GitHub, Postman, Bruno, Flutter Inspector, Dart DevTools

Experience

Flutter Developer

Systech Technologies

Al Wuheida St-Deira, Dubai- United Arab Emirates
Dec 2024 - Present

- Developed and maintained cross-platform mobile applications using Flutter for Android and iOS.
- Implemented real-time chat, voice/video calling, push notifications and payment integrations.
- Applied Clean Architecture, BLoC and RESTful APIs to build scalable applications.
- Collaborated with backend developers and designers to deliver production-ready features.
- Published and maintained applications on Google Play Store and Apple App Store.

PROJECTS

View360 - Enterprise Communication

[Play Store](#) | [App Store](#)

View360 is a cross-platform enterprise communication app built with Flutter for iOS and Android, following Clean Architecture with the BLoC pattern. It serves as a unified business platform combining real-time communication, productivity tools, and secure data handling in a single polished application.

- Implemented **SIP/WebRTC** based audio and video calling using **sip_ua** and **flutter_webrtc**, including call history, dialpad and native iOS CallKit integration.
- Built a full-featured real-time messaging system supporting chat history, media/file attachments and live message delivery through **Socket.IO**.
- Structured the application using **Clean Architecture** and **BLoC**, following domain-driven layers for scalable and testable state management.
- Integrated **Firebase Cloud Messaging (FCM)** for foreground and background push notifications with local notification handling.
- Developed enterprise features including ticket and task management, analytics dashboards, QR scanning, biometric authentication, AES encryption and file downloads with progress tracking.

View360 Engage - Customer Support Application

[Play Store](#) | [App Store](#)

Developed **View360 Engage**, a cross-platform customer engagement application built with Flutter for iOS and Android. The app delivers real-time voice/video calling, support ticket management, and biometric authentication — powered by **view360_chat**, a custom pub.dev chat package independently authored and published. Built on Clean Architecture with BLoC state management and multi-language support.

- Authored and published **view360_chat**, a reusable Flutter chat package on pub.dev, integrated as a core module within the application.
- Integrated **real-time audio/video calling** using the LiveKit SDK with background service support and media handling through FFmpeg and image/file picker packages.
- Applied **Clean Architecture** with **BLoC/Cubit**, **Freezed**, dynamic theming, biometric authentication, and internationalization (**i18n**) support.

Pathway - Education Platform

[Google Play Store](#) | [GitHub](#)

Developed a comprehensive learning app with user-friendly course exploration and mentor-student interaction. Enhanced user experience through push notifications, localization and real-time updates via web-sockets. Implemented robust admin tools for course management and user moderation.

- User authentication, explore courses, **complaint registration**, trending courses and interact with mentors.
- Added **push notification**, **localization** and **web-socket** functionality.
- Mentors can create profiles, upload courses and interact with students.
- The Admin Module includes functionalities for course management, addressing complaints and blocking or unblocking users and mentors.
- Worked with **RESTful API**, **MVC** and **Bloc** architecture.
- This project is operational on an **AWS EC2** instance, providing reliable performance and high availability.

FitMore - Ecommerce

[Amazon Store](#) | [GitHub](#)

Developed a dynamic E-commerce app enabling seamless product browsing, secure purchases and order management. Integrated user authentication, personalized recommendations and real-time notifications. Utilized MVC architecture for efficient development and maintenance.

- Built E-commerce app with **Hive** database for offline functionality, ensuring seamless shopping.
- Implemented secure user authentication for personalized experiences and safe browsing. product selection and payments.
- Integrated diverse product categories like **Dart** and **Flutter**, with intuitive UI for easy navigation and selection.

EDUCATION

Mobile App Development using Flutter

2023 - 2024
